

Salinity Management Project Oxnard–Port Hueneme Phase

Update: September 7, 2010

Week of September 7

Hueneme Road between Edison Dr. and Oxnard Industrial Drain: The westbound lanes will remain closed and all westbound traffic will use the eastbound lanes, with one lane in each direction east and west. The stoplights at the Edison Dr./Hueneme Rd. and Arcturus Rd./Hueneme Rd. intersections will be set to flashing red (all stop) with flaggers provided during peak morning and afternoon commute hours to facilitate traffic flow. Use of alternate routes, such as Pleasant Valley Rd., is recommended.

Hueneme Rd. near J Street: The traffic control set up for installing a tunnel under the J Street drain will remain for many weeks. One lane of traffic will be preserved in each direction, with limited flagging.

Work hours this week will generally be Monday through Friday 7 a.m. to 7 p.m.

How to Get Updates or Provide Comments

Updates on construction activities will be available at www.calleguas.com or at the project hotline at (805) 579-7151. To speak to someone about the project, call the hotline and press "0." Any messages left on the hotline will be returned promptly, even after normal business hours.

Thank You for Your Patience

Calleguas and its contractor will take all feasible steps to minimize construction impacts on the public. Calleguas appreciates the patience and understanding of local residents, visitors, and businesses during the construction of this vital water supply reliability project.

This update is based on the best information available at the time of publication. Construction is dependent on many variables, including weather, and this information is therefore subject to change.
